## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Drawings***

2. The drawings are objected to because:
  - a. in figure 1, "ADC\_CLK" should be shown as corresponding to the signal from timing recovery controller 49 to ADC 44 (see page 14, lines 7-13 and page 19, lines 12-14), not as the signal from offset controller 48 to offset compensator 43; and
  - b. in Figures 4-6 and 8-12, "SOFT-DICISION" should be "SOFT-DECISION".
3. The drawings are objected to under 37 CFR 1.83(a) because they fail to show the delay elements as holding the inputs for one sampling period in synchrony with a sampling clock as described in the specification. It appears that elements 614a-614c should have ADC\_CLK as an input clock signal. (See page 30, lines 23-27)

Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d).

4. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended

replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

5. The disclosure is objected to because of the following informalities:  
on page 11, line 26, "sift" should be "soft";  
on page 19, line 15, "filer" should be "filter"; and  
on page 23, line 23, it appears that "s" should be "a".  
Appropriate correction is required.

### ***Allowable Subject Matter***

6. Claims 1-15 are allowed.

7. The following is an examiner's statement of reasons for allowance: prior art of record does not teach or suggests in combination a signal processing device or method comprised of the limitations recited in claim 1, lines 11-35; claim 14, lines 11-42; and claim 15, lines 15-35, respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

8. This application is in condition for allowance except for the following formal matters:

objections to the drawings and specification.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following references disclose partial response systems/methods that include Viterbi decoders: Fitzpatrick (US Patent No. 5,689,532); Hayashi (US Patent No. 6,198,587 B1); Ashley et al. (US Patent No. 6,549,354 B1) and

Campello de Souza et al. (US Patent No. 7,113,555 B2). Bendetto (US Patent No. 5,825,832) discloses use of cascaded Viterbi decoders in a receiver.
